

Silicone Emulsion

This silicon emulsion is a specially formulated emulsion of an organofunctional silicone blend developed for rubber and rubber product manufactures, Polishing agents, and mould release. Dissolved solids enable the user industry to dilute the emulsion with water or distilled water to suit their solubility convenience or to their set of norms defined by them.

Properties

- Superior stability
- Ultra fine particle size
- Ease and versatility of application
- Absence of fire hazard

Technical data

General Characteristics

Property	Condition	Value	Method
Emulsifier type	-	Nonionic	-
Appearance	-	Milky- white	-
Diluent	-	Water	-
Solid content	-	40 ± 3 %	-
Density	-	0.94 ± 0.5	-
pH value	-	9 ± 0.5	-

Applications

- Chemical Industry
