

## Ferrous (II) Sulfate dried

---

**Form:** Solid

**Appearance:** Gray white powder

**Odour:** Odourless.

**Melting Point:** >300°C (release of crystalline water)

**Boiling point:** No information available.

**Decomposition temperature:** No information available.

**Solubility in Water:** 256 g/l (20°C)

**Solubility in Organic Solvents:** Insoluble in alcohol

**Specific Gravity:** 2,97 g/cm<sup>3</sup>

**pH:** pH 3 - 4 (50 g/l, H<sub>2</sub>O, 20 °C)

**Flammability:** Non-combustible material.

**Molecular Weight:** 151,91

**Partition coefficient n-octanol/water:** No information available

**Vapor pressure:** No information available
