

CHEMICIDE FG30

Product:

It is a fast acting, quaternary biocide for use in water circuits, air washer systems, process water systems. This biocide is the most effective against protozoa, algae, fungi, and bacteria. This biocide is effective to control biofouling in water circuit systems.

Dosage:

The dosage and frequency of treatment will depend upon the type and level of microorganisms present

Monitoring:

Monitoring should include regular Total Bacterial Count (T.B.C).

Physical & chemical properties

State	liquid
color	Colorless to light yellow
pH	4-6
composition	Aldehyde compounds, Quats
Concentration	Depend on the system 1.5, 2.4 and 4 %

Storage:

It should be stored in the shade. Keep container closed when not in use.
